Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgment

1. This Office Action is responsive to the Amendment filed on 11/07/2007.

Accordingly, claims 1-5 and 7-23 are pending in this instant application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 4, 5 and 7-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Hannan et al (US 6,943,591).

Regarding claims 1, 4, 5, 7, Hannan, as shown in figures 1 and 3, teaches a serial link transceiver with defect0detecting capability comprising differential transmitter (Fig. 1, left side of 120), differential receiver (fig. 1, right side of 120), differential transmission lines (120) and wherein the receiver includes monitoring system (400) that detects defect in the differential transmission lines based on the common mode. See also column 3, lines 32-44; column 4, lines 36-59.

Regarding claims 2, 19, 20, Hannan further teaches detecting the defects based on one of short circuit or open circuit. See column 1, lines 51-62.

Regarding claims 8-11, Hannan further teaches the monitoring system (400) to detect current and voltage. See column 5, line 51 to column 6, line 14.

Regarding claims 12-18, Hannan further teaches the monitoring system to sense AC and DC. See column 4, lines 10-12; column 6, line 57 to column 7, line 17.

Allowable Subject Matter

4. Claims 3, 22 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 1-5 and 7-23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Herring et al (US 6,373,262), Hattori (US 6,791,369) and Ficken et al (US 2005/0040864) are cited because they are pertinent to the apparatus for detecting fault in the differential transmission lines based on the detected common mode voltage.
